MONTHLY REPORT

Summary of the intern's activities undertaken for the entire month as a learning experience

A surveying Tool Development:

- Focused on the design and development of a surveying tool, which aimed to streamline data collection and improve operational efficiency.

Technical Support:

- Provided ongoing support to staff for various technical and IT-related issues, resolving challenges and ensuring smooth day-to-day operations.

Problem-solving and Collaboration:

- Worked collaboratively with team members to troubleshoot technical issues, offering solutions that enhanced team productivity.
- Developed problem-solving skills by tackling diverse IT challenges and collaborating with colleagues to implement solutions.

Experience:

This month, my primary focus was on developing a surveying tool, which gave me valuable hands-on experience in software development. In addition, I provided support to staff members facing technical and IT-related challenges. This role sharpened my technical skills, particularly in problem-solving, and deepened my understanding of the importance of supporting teams with the right tools and solutions. My ability to collaborate with colleagues across departments also grew, and I recognized the impact of effective communication and teamwork in achieving technical goals. This experience has strengthened my desire to contribute to the organization's success and provided me with practical skills that will be essential for my future career.
